## Dash 4.1.1 For Mac

Dash is an API Documentation Browser and Code Snippet Manager Dash helps you store snippets of code, as well as instantly search and browse documentation for almost any API you might use (for a full list, see the screenshots).. If you're also not familiar with Dash, I'll recap for a time. Version 3 of the research tool was released lately, and it proceeds to become a device I'd become dropped without.. Dash 3 As a Macintosh and iOS builder, web designer, Unix fan and all around coder, Kapeli's offers become an indispensable component of my workflow.
